## **DETAILED ACTION**

### ***Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species of the claimed invention.

I. The species best illustrated by the claims directed to a belt buckle assembly, including a housing and a locking member that are secured by a pair of locking levers.

II. The species best illustrated by the claims directed to a belt buckle assembly, including a housing, a locking member and an optical switch that provides an indication of when the locking member is secured to the housing.

III. The species best illustrated by the claims directed to a magnetically translucent buckle assembly.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no generic claim has been identified.

3. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

4. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record

showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. A telephone call was made to Mr. Orville Cockings on August 23, 2004, to request an oral election to the above restriction requirement, but did not result in an election being made.
